Two-tier regeneration vs storing everything, by start year and horizon (growing corpus, g=20%/yr)
Image (FLUX.1-dev, c = 2100 TFLOP)
Audio (MusicGen Large, c = 21 TFLOP)
Molecule (Uni-Mol, c = 5 TFLOP)
evaluation horizon (vs tape)
first generation year (vs tape)
evaluation horizon (vs HDD)
first generation year (vs HDD)
